All the Fine Car Features ... at the lowest possible price!

PONTIAC is known as the "Low-priced car that has everything." All of today's fine-car improvements—advanced performance and comfort—thousands of trouble-free miles. These are the extra value features that Pontiac gives so generously—at such low prices.

Just step behind the wheel of a Pontiac. The very feel of the car tells you that here is something different—*fast*. Not mere transportation, but a big, luxurious car that will give thorough enjoyment.

Try the improved Spacer-Mesh Transmission and watch how Pontiac picks up. How flexible the car is in traffic! Test First Wheeling on the straightaway. And just watch how smoothly Pontiac takes the bumps, thanks to the new Ride Regulation. Another comfort-going feature, exclusive to Pontiac among cars of its price, is the 47-point live-rodder cushions which literally soak up bumps and shock.

Then—and this is important—the 114-inch standard wheelbase is large enough to provide luxurious riding ease.

Look about the car itself. The body is by Fisher. See how big it is and how roomy. Note the wide Y-shaped radiator—cleaning windshield—sweeping body lines—the deep, wide seats—rich fabrics and appon trims.

And now, the matter of dollar and cents. Does it cost a lot to secure these desirable qualities? It does not! With all of Pontiac's advantages in greater size, comfort and performance, prices have been reduced and running costs are very low. If you care to buy on G.M.A.C. terms, you'll find the down payment very little more than that of the lowest priced car you can buy.

Speed a few minutes—now—or the community Pontiac dealer's and prove, to your complete satisfaction, why it is not necessary to pay more than Pontiac prices for today's fine car features.

"IT MEANS TWO MONTHS just dropped out of my life"

LIFE is almost stolen during those long weeks between the old teeth and the new ones. You are not exactly "dropped" by your friends—you drop yourself—about as able—often so lonely—making one more quickly see the value of an emergency supply.

What causes this mental suffering except the simple fact that lost teeth are usually just one tooth. If your dentist wanted to be absolutely frank and accurate your feelings, that is just what he would tell you. "It's just one tooth."

Why must we live tooth-hungry?

Some teeth are lost through accident. Some are lost through decay. But the great surprise is when the dentist brings the word—"pyorrhea"—and the emergency. Because pyorrhea is a

disease of the gums—a disease that works beneath the surface. Sometimes it works for five or even ten years before its effects are known. Teeth lost through pyorrhea are likely to be loose, badly worn to far as the eye can see. That is the great danger of pyorrhea.

Pyorrhea costs half the loss.

Now you can see why it is so important to get your dentist to opportunity to check up regularly, because only the dentist can detect pyorrhea in its early stages. Don't keep your dentist and down to repair work. Give him a fair chance at prevention.

More than half the losses of adult teeth are due to pyorrhea, pyorrhea is becoming very rapidly detected in thoroughly vetted in the treatment of the disease. In fact, thousands of dentures from coast to coast today are using as

their charm the special pyorrhea treatment of Dr. E. J. Forham. That is his professional formula. His bone formula is included in Forham's Toothpaste, and it cannot be obtained by the public in any other way. You can't have healthy teeth in unhealthy gums, and Forham's is really a double-duty toothpaste. Use it twice a day for both teeth and gums. It's worth taking seriously.

Missing gums may mean you're lost.

Preserve your natural teeth. Don't wait for a warning. For your dentist twice a year. Use Forham's carefully—the whole family. It's a supremely fine toothpaste, and also includes that in the big pyorrhea plus of the Forham bone formula. Remember that. And read the directions on the big, brown tube. At all drug stores. Is your information up-to-date on Canada's magazines?

IF YOU are under the impression that Canada has any lack in the way of important magazines, or if your knowledge of the advertising situation is based on conditions of a few years ago—

Then it is time to bring your information up to date.

The fact is that, editorially, typographically, in circulation and in influence, the leading magazines of Canada compare favourably with those of any country in the world.

They have won their way in competition with magazines coming into Canada from both the United States and Great Britain. They are rapidly displacing the best of "foreign" magazines because their enterprise and high character appeal to Canada's pride in things that are purely Canadian.

With their enhanced prestige and influence, Canada's magazines have become the national

media to an extent not surpassed by the strongest groups of magazines in any other country.

With a net paid circulation totalling more than 750,000 copies each issue, the five magazines listed on this page now provide a coverage of better than every second urban home from coast to coast. Their circulation is more than two and one-half times what it was ten years ago. Their prestige and influence has been enhanced accordingly.

The use of these magazines is now giving scores of advertisers national publicity of a character and value which cannot be equalled through any other form of advertising at anywhere near the same low cost.

Much convincing data is available concerning the economies, results and other advantages of magazine advertising in this country. Your enquiry will be promptly met by any of the magazines listed below or by the office of the Magazine Publishers' Association.

In Canada the trend in advertising is toward the magazines

These five magazines are of uniform page size, all use AISC standards and all are members of the Magazine Publishers Association of Canada, 604 Richmond St. W., Toronto.

Woman Worship

Says this writer: "Canadian men treat their women too well . . . and the women do not like it"

By LADY RENA TERRINGTON

GOOD NIGHT my dear. And if my husband loves me tonight, I think I shall like it."

A strange remark to him when a pleasant dinner party at Congress House was one of the pleasures of the Democrats. But nevertheless true. Made by the wife of one of the more popular men, yes, and the reply to a long tirade on my part on "How to treat women."

My spouse at work, and marriage has been amazing. You'll marry with I have had, and you'll come to Canada I did not know how to my wife was.

Caribbean men do sexual violence, too, well. They have an old time character which, not only is free of long years of hard fighting and rough living. The women make them women's men and they are too close-minded to use the lies of class. It is not merely the fault of the women. They have come to take everything like a matter of course. They must work for their love for their parents, their old women, and live as they can. The women do not quite realize what a wonderful break this, however.

I am sincerely sorry that we have lost the joy of our life through this process. But I know there is more to come. And it is as well and will stay at home and help their progress."

And the women do not like it. Not a bit. They have broken out of a self-imposed gossamer shell about love and companionship. They do not trust this independence as it is so provoking for feminism. *Oh, dear me!* That is the new privilege. They are to have freedom of action. They are to have their own friends and enter their lives on their own, but the men must always remain loyal. They may take a trip to the city but the man, even in home and love

Marriage is taken a good deal more seriously in Canada. In the first place, families are generally larger: 400,000 newlyweds, and it is harder to break up a home of twenty, your standing with a family than it is to park up a small apartment, where there are never any more for children, or any new business partner to introduce. Then is one of the greatest differences between marriage here and in the States.

Country: The growth of agriculture, the increased population and the economic situation in England have all combined to work home life. Women think their responsibilities are eased since they have produced a small family, and that they are at liberty to go out into the world and live their own lives. The children go to boarding school and if their wives have one hobby and find their persons are appreciated or even romantic - well, they all stay put home.

She has come to take everything in a matter of course, but must for her husband, learn to children and look after his home, and she simply does not understand that the boy in her is a personhood. The truth of the matter is that such delinquency is so far from unique that it is almost impossible to find a man who has not at one time or another been in the hands of the law. As a result, the police are not only the most visible and most feared of government agencies, but they are also the most trusted. The police are the only government agency that is not only feared but also trusted.

At another house, an old man told me about the truth about George Jackson's physical state in those prisons. He was very frightened of a huge dog that lay down on the back of the house, chained to his kennel. The old man came from Italy, and with him came, among other things, a dog of his kind, and he added it to the chain. When the dog barked at the office it seemed as if he were bawling, and the German man living there roared. Get Readjusted

THE MEN who made this continent rich in wealth and opportunity did not go about wringing their hands and quaking in their boots. They worked—whether the going was easy or whether it was hard.

For nearly three years too many men, who themselves have had plenty to eat and to drink, good beds to sleep in and comfortable homes, have spent hours and hours predicting hard luck and disaster.

The man who is saturated with gloom spreads it. When he loses his sane, clear-eyed viewpoint he may seek sympathy, but what he really needs is to be shaken out of an unhealthy frame of mind.

And the man who hoards not only robs his family but fails to do his share in promoting normal business and employment of workers. He aggravates the condition which he deplores.

Some men need jobs—need them badly. They must be helped. But more men need to get readjusted to conditions as they exist. These men may need to readjust their mode of living or their way of thinking.

Worries fester and grow in the dark. They shrivel and vanish in the light. There are times in every man's life—whether he be strong or weak, brave or cowardly—when he needs the counsel of someone who is unafraid. And there are many who know that our country has battled through difficult periods and has always emerged stronger than before.
